

“ AI, fleshed out ”

I-RIM

Italian Institute of Robotics
and Intelligent Machines

In cooperation with

3 DAYS

OF ROBOTICS AND INTELLIGENT MACHINES

OCTOBER 18-20, 2019

ROMA

I-RIM is the Italian Institute of Robotics and Intelligent Machines, a no-profit association born in 2019

I-RIM favours the development and use of Interaction Technologies to improve the quality of life and the well-being of citizens and the society

I-RIM fosters the development of new solutions for assisting people, improving working conditions, production and its sustainability, creating economic value from research

I-RIM helps industrial partners to fulfill their innovation needs, and promotes the application and transformation of research ideas in products and processes

I-RIM creates opportunities for matching high-tech demand and supply on a national and international scale

I-RIM focuses on Italian excellence in Interaction Technologies, and cooperates with Information Technologies to favor the interests of the entire society

I-RIM contributes to the creation and representation of a national group of stakeholders in the field of Robotics, Intelligent Machines, and Interaction Technologies

Popular Talks
ROBOTICS FOR EVERYONE

The revolution of Robotics and Intelligent Machines. In plain words.

Expo
FROM PROJECTS TO PRODUCTS

What is there today and how it is going to change. Exhibition of the robots and intelligent machines produced by our industries, of the projects that are changing them, and of the programs in support

First Edition

ITALIAN CONFERENCE ON ROBOTICS AND INTELLIGENT MACHINES

Dissemination of the excellence in research toward those who develop products and applications. Clear presentation style for attendees with technical but not academic background. Thematic workshops for diving deeper in cutting-edge technologies

Association Life
GENERAL I-RIM ASSEMBLY
The Institute plans its strategies

TT ORCHESTRA REHEARSAL

Towards a coordination of public and private technology transfer instruments

Matchmaking
WHEN RESEARCH MET INNOVATION

Interaction Technology demand meets supply. Industry, market, and capital will meet through dynamic mechanisms at national and international scale

PREPARING FOR THE DIGITAL WORLD

Designing and building technical careers in Interaction Technologies
